PROFESSIONAL SUMMARY

Business analytics professional with an M.S. in Management Science & Quantitative Methods and experience across banking, higher education, research, and technology. I translate business and customer data into actionable insights through KPI analysis, dashboards, reporting, statistical analysis, and data visualization. Hands-on experience with Power BI, Tableau, SQL, Python, R, SPSS, Excel, and SAP — plus cross-cultural survey research, customer experience analytics, and financial and service-quality reporting — communicating findings clearly to academic and business audiences.

CORE SKILLS

Business Analysis: Business Analytics • KPI Analysis • Performance Reporting • Data-Driven Decision Support • Process Analysis • Customer Experience Analytics

Data & BI: Power BI • Tableau • SQL • Excel • SAP • Data Visualization • Dashboard Development • Data Validation

Analytics: Python • R • SPSS • Regression Analysis • Statistical Analysis • Survey Design • Cross-Cultural Research

Delivery: Agile • Jira • GitHub • Stakeholder Communication • Analytical Reporting

PROFESSIONAL EXPERIENCE

Atlantis University

Teaching Assistant | May 2024 – Present | Miami, FL

- Support quantitative methods and business analytics instruction using R, SPSS, Excel, and Power BI, translating analytical concepts into practical business applications.
- Develop analytical learning materials and provide one-on-one consultations to help students interpret data, regression results, and business insights.
- Support institutional data collection and academic performance trend analysis.

Atlantis University

Graduate Research Fellow | December 2025 | Miami, FL

- Led applied research on AI and customer experience in retail banking using a cross-cultural dataset of 300+ survey responses from the US, Europe, and Asia.
- Analyzed relationships among AI explainability, trust, satisfaction, and loyalty using mediation models and bootstrapped confidence intervals.
- Built Power BI dashboards comparing NPS and CSAT across demographic groups to communicate customer-experience insights.

Intern Protege Inc.

Data Analyst | May 2024 – August 2024

- Analyzed user-interaction data in Excel to identify usability patterns and support evidence-based interface improvements.
- Collaborated in an Agile environment using GitHub and Jira.

NIC ASIA BANK

Business Data Analyst | January 2022 – December 2023 | Kathmandu, Nepal

- Built analytical dashboards and validated data pipelines using Excel and SAP to monitor customer retention, service quality, and financial-risk KPIs.
- Produced compliance and performance reports aligned with central-bank regulatory standards, supporting data-driven operational monitoring.

Tribhuvan University

Researcher | September 2021 – March 2023 | Kathmandu, Nepal

- Conducted master's thesis research on internal-audit effectiveness in Nepalese commercial banks using multivariate regression in SPSS.
- Performed model diagnostics and sensitivity analyses to evaluate research findings.

Tribhuvan University

Research Assistant | September 2020 – December 2021 | Kathmandu, Nepal

- Supported faculty research through quantitative instrument design, dataset preparation, and regression analysis.

Sudarshan Saving & Credit Co-operative Ltd

Executive Administrative Assistant | January 2018 – August 2021 | Kathmandu, Nepal

- Administered customer accounts, financial records, and transactional documentation while maintaining audit-ready institutional records.

EDUCATION

Atlantis University — M.S., Management Science and Quantitative Methods | December 2025

Tribhuvan University — M.S., Business Administration | August 2023

Tribhuvan University — B.S., Business Studies | August 2020
